Marta McClay

President

Geophysical Society of Oklahoma City

Oklahoma City, OK 73118

Dear Ms McClay,

Thank you and your organization 'Geophysical Society of Oklahoma City' for selecting me for this prestigious scholarship. I am glad to receive the educational award. I would also like to take the opportunity to thank "SEG Foundation" for their continuous support in geosciences education.

This is my fourth semester in my PhD program at University of Oklahoma. My studies are concentrated in Seismic Stratigraphy, Seismic Geomorphology and Reservoir characterization with emphasis to deepwater depositional environment. This scholarship will be a great encouragement during my studies and will enable me to perform many activities related to my research.

Once again, I greatly appreciate the assistance you have provided me and for your continuing support to students. I will be glad to report the progress in my dissertation in future correspondences.

Best Regards

(Supratik Sarkar)
